RESINS
Engineering solutions that matter.
We provide complete industrial protection solutions, including evaluation, supply, and installation of high-performance wear-resistant materials, epoxy, cementitious lining, steel plate repair systems and Corrosion protection. Our services also cover structural rehabilitation, fabrication of chutes, transport pipes and other industrial repairs for long-lasting durability and performance of equipments.

Creusabro®

A whole range of products

Submitted to hard abrasion and wear, industrial equipment is too often re-inforced with materials unadapted to severe criteria (impact, temperature, humidity, etc...).

Range offers today steels able to meet all specific user's needs.

Creusabro® *4800 & 8000*

Usually, choice of material is made on a price and hardness basis. However, users have to face difficulties of wear parts replacement. One must therefore add to the material price both the costs of maintenance and production downtime in order to establish the true cost effectiveness of a material.

Wear resistance and processing ability are of greater importance in the choice of an abrasion resistant steel than hardness level.

TRIP effect (*Transformation Induced by Plasticity)* and presence of micro-carbides together allow and grades to give the real solution to this choice with an original concept: **the active surface resistance.**

ELI-CHEM RESINS

A range of resin products for use in industry from conveyor belt repair resins to abrasion-resistant lining and pipe repair products. We can supply a resin system tough enough to cope.

ELI-COTE FR1011

Brushable Ceramic Lining coating is a two-part, quick setting polymer resin compound with micro ceramic content. FR1011 has been developed for the protection of surfaces subject to wear, abrasion and chemical attack.

BACKING COMPOUND

Eli-Crush FR866 Epoxy Crusher Backing Resin is a two part, ambient temperature curing, filler extended epoxy resin with good impact resistance and very low shrinkage.

ELI-COTE FR1010

Ceramic-filled Mortar is a two-part, filler extended epoxy resin. It has been specifically formulated for the protection of surfaces subject to extreme wear and abrasion caused by solids or slurry. The mortar provides a long-lasting lining to metal and concrete surfaces.

ELI-FIL FR983

It is a super steel, ambient temperature curing, two component epoxy repair compound characterized by its steel-filled paste with outstanding wear resistant properties, high mechanical strength and high heat resistance.

ELI-COTE FR1008D1

Wear resistant epoxy compound with two part, ambient temperature curing epoxy repair or maintenance compound containing abrasion resistant fillers.

ELI-WRAP

Eli Wrap Pipe repair bandages are a quick action emergency pipe repair system that stops leaks instantly.

ELI-FLEX 909N60

Eli-Flex is a two part polyurethane resin formulated to effect quick and easy conveyor belt repairs.

CORROSION, ABRASION & WEAR PROTECTION

products are cementitious lining and coating protection, specialty concrete for specific applications and protection of industrial equipment.

AREAS OF APPLICATION

Bunker	Autoclave Feeding Pipe	Dewatering Screw Conveyor	Hydraulic Transport Systems	Chain Conveyor Systems
Chutes	Quenching Tower	Ball Mill	Pneumatic Transport Systems	Hydrocyclone
Coolers	Dedusting Axial Cyclone	Cyclones	Mechanical Transport Systems	Impact Plates
Conveyors	Pulverized Coal Injection	Separator	Apron Conveyors	Tailing Systems
Coke Ramp	Slag Granulation System	Ramp and Road Lining	Trough Chain Conveyors	Slurry Transport
Feed Drums	Pneumatic Material Support	Flash Dryer	Separator Systems	Submerged Chain Conveyors
Wind Boxes	Scrubber	V-Separator	Pumps	NID-Systems for Flue Gas Cleaning
Dust Catcher		Chutes Pumps		GSA-Systems for Flue Gas Cleaning
Discharge Table				

Our Customer commitment

The Unilox Advantage: High Performance, Customer-First

Unilox Industrial Corporation doesn't just deliver premium industrial products—we deliver an exceptional customer experience. Your goals drive our innovation, and your satisfaction is our ultimate metric of success.

Solutions Tailored to You: You are the blueprint for everything we do. We actively consult with you to truly understand your needs, constantly evolving our services to exceed your expectations.

Partnership, Not Just Provision: We treat your business as our number-one priority. Our team builds lasting relationships by offering complimentary, on-site expert consultations and tailored product designs to get your project moving faster.

Turning Insights into Innovation: Your voice matters. We welcome your feedback and act on it quickly, transforming every comment into an opportunity to refine our processes and serve you better.

The Unilox Standard: Experience a partnership rooted in professionalism, integrity, and warmth. We ensure every encounter is dependable, respectful, and entirely focused on making you feel welcome and supported.
